State of Lending in Indonesia

P2P lending sees phenomenal growth in loan disbursements, largely to MSMEs

According to the MSME Ministry, Indonesia had 64 million MSMEs in 2018, of which 63 million are micro businesses. The MSME sector has absorbed 97% of workers, thereby contributing 61% to the country's gross domestic product. These MSMEs are highly underserved as they are costly to serve due to lack of credit information and history. According to the government*, around 41 million MSMEs have access to credit from financial institutions while 23 million are not bankable. According to Asian Briefing**, only eight million MSMEs have an online presence.

In 2019/2020, increased P2P lending companies develop AI-powered credit scoring models and alternative lending solutions to serve the large, underserved population. As per 2020, total funding from P2P platforms reached IDR 113.46 trillion (USD7.7 billion) with close to 26 million borrowers, from over 160 fintech companies listed with the OJK, according to data from Bank Indonesia.

Source: Otoritas Jasa Keuangan (OJK)

Government's initiatives to boost lending MSMEs during COVID-19

Loan restructuring (OJK Regulation No 11 /POJK.03/2020)	Mar 2020	OJK published a policy package for commercial banks that includes relaxation measures related to reporting, credit treatment, and governance of restructured credit or financing.
National Economic Recovery Program	May 2020	The Finance Ministry has allocated Rp35 trillion (US\$2.4 billion) to bail out the millions of MSMEs by subsidizing the interest costs and guaranteeing their loans. The ministry outlined detailed procedures to access the subsidies.
Working capital credit (Regulation 71/PMK.08/2020)	Jul 2020	The government guarantees Rp100 trillion (US\$6.9 billion) to provide MSMEs with short-term cashflow relief. Under the guarantee program, the government expected that the banks channel between Rp65-80 trillion worth of loans.

**Asian Briefing article titled 'Indonesia Issues Regulation on Working Capital Incentives for MSMEs'

Lending Companies by Target Market Segment

The P2P industry is resilient in Indonesia's rapidly growing fintech industry, representing 51% of the country's fintech companies. It has attracted the attention of local and foreign investors who have poured millions into fintech startups in 2019/2020.

Leading Indonesia lending fintech are gaining traction in raising funding capital

Valuation	P2P Lending to consumers	P2P Lending to Businesses
\$50M and above	 	
\$20-50M		  
\$0-20M	 	  

Major Regulations/ Milestones in P2P Lending

2016	The OJK issued Regulation No. 77/POJK.01/2016 on Information Technology-Based Lending Services, which came into force on 29 December 2016
2018	On 31 December 2018, OJK issued a regulation (No. 37/POJK.04/2018) on equity crowdfunding that enables SMEs to sell their shares through electronic platforms. Equity crowdfunding remained in its infancy until 2020.
2019	E-wallet providers OVO and Akulaku have begun providing P2P lending, remittance, and investment services to its users, paving way to transform into digital banks
2020	There are numerous cases of fraud, unethical collection practice, as well as sky high rate which raised great concern from regulator. OJK blocked a total of 2,591 fraudulent platforms in 2019/2020. Fintech Lender Association (FLA) partners with OJK and launches Fintech Data Center (FDC) enhance credit assessment. P2P firms will be able to exchange other companies' data, such as debtor's identity cards and tax identification numbers. Other regulations related to fintech activities, such as data privacy and cybersecurity, will also be enhanced by regulators to accommodate the needs of fintech business schemes.

LICENSED LENDERS (33)

REGISTERED LENDERS (126)

Impact of COVID-19 on P2P Lending

Surging online loan demand

The online lending industry is already registering a rise in demand. Small businesses or gig workers* experience direct impacts and need quick microloans to stay afloat during the pandemic.

Increased risk of non-performing loans

P2P lending platforms are struggling with risky loans as loan restructuring requests surged. Nonetheless, the integration of Fintech Data Centre (FDC) is able to press even better against NPL risks.

Decline in funding

Investors are becoming more cautious and risk averse. Lending start-ups postpone launches and adjust priority to protect business, employees, and customers.

Impact on partnerships

Lending fintech faces delays in collaborations especially when it involves governmental institutions with layered bureaucracy. Partnerships between fintech and businesses also impacted due to postponing business plans.

Push for more online services

Restricted social distancing and business operations offer fintech lending the advantage over conventional financial institutions. Fintech lending companies do not require any physical interactions.

Enable technology

As the risks of non-performing loans increased, fintech lending increased digital tech adoption such as e-KYC and new demand for ecosystem like APIs

Notes: Gig workers are independent contractors, freelancers who hold temporary, flexible jobs such as online taxi or motorcycle drivers, delivery men, owners of small kiosks.

Regulations of the Indonesian Fintech

In Indonesia, the OJK and BI regulate the provision of fintech products and services. The OJK regulates the provision of fintech products and services other than those related to payment services, while BI regulates all fintech products and services related to payment services.

The Indonesian government is supportive of financial innovation. OJK Regulation No. 13/POJK.02/2018 on Digital Financial Innovation highlights the existence of a regulatory sandbox process, and enhances responsible finance innovation, data security, good governance, customer protection, and anti-money laundering/ anti-terrorism.

P2P Lending

The OJK issued Regulation POJK 77/2016 on Information Technology-Based Lending Services (POJK 77/2016). The Indonesian Fintech Lending Association (APFI) has also issued a Code of Conduct in which P2P lending companies are prohibited from imposing high interest and other fees, as well as misusing consumers' data.

Crowdfunding

OJK Regulation No. 37/POJK.04/2018 dated 31 December 2018 on Information Technology-Based Crowdfunding Services Via Public Offerings defines equity crowdfunding that provides access to SMEs in raising funds for the development of their businesses by selling shares to the public.

Payment Services

Payment services are primarily regulated under Bank Indonesia No. 18/40/PBI/2016 on the Operation of Payment Transaction Processing and PBI No. 20/6/PBI/2018 on Electronic Money and PBI No. 14/23/PBI/2012 on Transfer of Funds. The scope of regulated activities covers pre-transaction, authorization, clearing, settlement, and post-transaction activities.

Open banking

In April 2020, BI published Consultation Paper (CP) regarding Open API Standards in association with open banking and banks interlinkage with fintech for Payment Services Provider (PSP), which pushed the financial industry to develop open banking. BI is aware that API would be able to boost the digital economy. But a lack of security standards and data protection regulation is holding up the progression.

Insurance products

Insurance products are generally regulated under OJK Regulation No. 23/POJK.05/2015 on Insurance Products and Marketing of Insurance Products, which allows insurance companies to sell and market insurance products through insurance agents, banks, or non-bank institutions. Currently, there is no specific regulation governing the selling of insurance products specifically through fintech companies. Microinsurance products, however, are allowed to be marketed and sold through the internet.

Credit Scoring

Based on OJK Regulation No. 18/POJK.03/2017 on Reporting and Requesting of Debtor Information through the Financial Information Services System (SLIK). The SLIK collects and records credit or loan facility data submitted to the OJK to generate the credit information status of a person. The scope of reporting companies covers both financial institutions (FSI) and non-FSIs. Fintech companies, specifically P2P lending companies, may become reporting companies upon obtaining approval from the OJK.

Crypto assets/ Digital Currencies

Commodity Futures Trading Supervisory Authority (Bappepti) governs the operation of digital currency exchanges under Regulation No. 5 of 2019 on Technical Provisions Governing Physical Futures Trading of Crypto Assets. However, there are no regulations specifically governing the use of crypto assets as digital currencies, meaning that crypto assets are prohibited to be used as digital currencies, including in digital wallets or e-money.

Artificial Intelligence

POJK 13/2018 allows the use of artificial intelligence and robo-advice in the financial services sector, whereby artificial intelligence is recognized within the market support group while robo-advice is recognized as part of the other digital finance support group.

Major M&A and Partnerships 2019/2020

As the government continues strengthening the fintech regulations, more fintech players see huge potential in the Indonesian market. M&A activities intensified the battle of the super-app, and a possible merger between Grab and Gojek was discussed.

Period	Investors	Investment Value	Fintech/ Company	Sector
Apr 2020	 gojek	US\$130 MILLION	 MOKA	POS Service
May 2019	 akulaku	US\$35 MILLION	 BANK YUDHA BHAKTI	Digital banking
Apr 2019	 OVO	US\$20 MILLION	 bareksa	Investment
Dec 2019	Wealth Track Technology (WTT), Metamorfosis Ekosistem Indonesia (MEI)	US\$17 MILLION	 bank artos	Digital banking
Aug 2020	 FUNDTASTIC	US\$6.5 MILLION	 INVISEE <small>YOUR RELIABLE EASY INVESTMENT</small>	Investment
Feb 2020	 gojek	UNKNOWN	 JD.ID	E-commerce
Sep 2019	 Grab	UNKNOWN	 OVO	Digital wallet
Still in negotiation as of Jun 2020	 OVO	MERGE	 DANA	Payment

Since 2019, collaboration is the name of the game. Fintech, platforms, banks, and government have been working together to build new digital services and boost financial inclusion in a country where millions are unbanked. Home to a robust population of digital natives, Indonesia becomes a hot spot to fintech players. Digital players have been actively participating in collaborations with leading platforms such as Tokopedia, Bukalapak, Traveloka, and Gojek.

Fintech, banks, and platforms that actively participate in collaborations and fintech innovations*

PAYFAZZ

PAYMENT

Launched in 2016, Payfazz is an agency-based financial platform that facilitates bill payments, mobile top-up, money transfers, etc. As of Jul 2020, Payfazz has over 250,000 active agents. It expanded to P2P lending, POS system, and freelancer marketplace. In 2019, Payfazz processed US\$1.2 billion in annual transactions.

LinkAja!

PAYMENT

Launched in Mar 2019, LinkAja is a centralised QR code payment platform that unites four of Indonesia's state-owned banks with the country's national carrier Telkom Indonesia and state-owned energy corporation Pertamina. LinkAja facilitates e-payment, digital financial services, and fund transfers.

JULO

LENDING

Julo, a P2P lending platform, offers unsecured consumer loans of about US\$300 at aggressively competitive rate of 3-5% per month. Julo has managed to keep its interest rate low by using alternative data to power its proprietary credit scoring technology. In Sep 2019, Julo raised US\$10 million in Series A2, led by Quona Capital.

Emerging Digital Players To Watch In 2021

ALAMI

LENDING

ALAMI is a SME financing platform that is focused on Islamic market. Since it established in late 2017, ALAMI has disbursed loans of about US\$4 million within two years with non-performing loan rate close to 0%. ALAMI cooperates with Bank Permata Syariah, and transactions are carried out with sharia contracts.

UANGTEMAN

LENDING

UangTeman, one of the first P2P cash lenders licensed by OJK, offers unsecured micro-lending service where credit decisions are made real-time and instantly by big data analytics that determines creditworthiness. The fintech is expanding to the Philippines and is in the process of obtaining license.

modalku

LENDING

Operated as Funding Societies in Singapore, and the largest in Southeast Asia, Modalku is a crowdfunding platform for SME financing, based in Jakarta, Indonesia. Modalku's machine learning based risk assessment model, partnership ecosystem, and range of loan services facilitated it to grow exponentially during past three years.

LENDING

Operated by FinAccel, it is a credit lending app that enables customers to secure credit between US\$100-2,200. Kredivo's payment option is integrated with e-commerce and food delivery apps, so users can 'buy-now'pay-later'. The startup secured US\$90million in late 2019 to further expand in Southeast Asia.

LENDING

Founded in 2015, it is the leading P2P lending platform for SME. It leverages machine learning to connect businesses that are eligible to make the return and connects them with lenders. Since its inception, KoinWorks raised a total funding amount at US\$62 million in 2020.

LENDING

Founded in 2015, Investree is a P2P lending marketplace for SMEs for both conventional and Shariah businesses. Investree partners with Bank BRI to provide working capital loans for SMEs. Secured about US\$24 million in 2020, the fintech plans to expand to Thailand and the Philippines through joint ventures.

LENDING

Incorporated in 2010 as a micro lender then transformed into a fintech lending in 2016, Amartha is pioneering P2P lending for micro entrepreneurs. Amartha connects unbanked micro-entrepreneurs with lenders interested in making investments. It leverages technology to reach geographically remote villages.

LENDING

With 6 million users and counting across Southeast Asia, Akulaku offers three major services – online credit, wealth management, and digital banking. In 2019, Akulaku started its wealth management, which became the largest online wealth management platform in Indonesia, with more than 100,000 monthly active users.

LENDING

Akseleran is a P2P lending platform that provides access to capital for SMEs with competitive rates and flexibility in loan tenors, payment models, and collateral participation. Since its establishment in Oct 2017, Akseleran has disbursed more than US\$73 million in loans to 2,000 MSMEs within two years.

INVESTMENT

Founded in 2017, Halofina is a robo-advisory platform that helps users who are mainly Millennials to manage their finance and build investment strategies. Halofina also connect users to financial products providers. Halofina raised pre-Series A funding from Mandiri Capital Indonesia and Europe's Finch Capital in Nov 2019.

INVESTMENT

Stockbit is a stock market social community that redesigned information and ideas sharing for stock investors and traders in Indonesia. In May 2019, Stockbit closed a Series A round from East Ventures. Currently, Stockbit is Indonesia's highest rated stock investment app on both iOS and Google Play.

INVESTMENT

Founded in 2016, Pluang offers a gold savings product that allows investments starting from 0.01grams and with real-time liquidity as the gold is kept in a government-backed institution through the official Indonesian commodities exchange. Pluang raised \$3 million in Series A funding led by Go-Ventures in Q4 2019.
